Education

Vellore Institute of Technology

B. Tech in Computer Science with Specialization in Data Science

CGPA: 9.49/10, Ranked 9th & Awarded with a **Merit Scholarship** in Sem IV

Aug 23 - July 27

Vellore, Tamil Nadu

Chirec International School

Achieved **1st rank overall & in Science** in AISSCE

Percentage: 98.2% & Received a **Gold Medal** at school level

June 21 - Feb 23

Hyderabad, Telangana

Projects

VitaVerse - Healthcare Digital Twin [↗](#)

- Developed VitaVerse, a Healthcare Digital Twin platform that predicts disease progression and future clinical outcomes using **XGBoost**, **LSTM**, and **time-series forecasting models**.
- Built an **interactive what-if simulation engine** to evaluate the impact of lifestyle changes.
- Implemented **Explainable AI (SHAP)** and deployed a real-time analytics dashboard using **Streamlit**, **FastAPI**, and **Plotly** for transparent healthcare decision support.

FortiScan [↗](#)

- Developed an AI-based system that analyses insecure code and automatically suggests **secure corrected implementations**.
- Implemented **LLM-based vulnerability detection** to identify security flaws such as unsafe input handling and insecure logic.
- Built a pipeline for **code parsing, issue highlighting, and automated secure code generation**.

PriceIQ - Dynamic Pricing Engine [↗](#)

- Built an end-to-end Dynamic Pricing Engine using **XGBoost demand forecasting** and **grid search optimization**, achieving **R² of 0.85+** across 4 product categories with 2 years of synthetic retail sales data
- Price elasticity modeling & competitor intelligence features** to recommend **revenue-maximising** prices, **reducing manual pricing decisions** by simulating real-world e-commerce pricing strategies.
- Developed an interactive **Streamlit** dashboard with **Plotly** visualizations.

Work & Experience

Adani Enterprises & Ltd - Analytics & AI Intern

May 25 - July 25

- Authored a **white paper** explaining the architecture and optimization logic of the **Vessel AI system** for internal stakeholders.
- Integrated and prepared data from **PDT (2.6K+ rows)**, **SAP systems (3.9K+ rows)**, and **CSI sources**, analysing **6.6K+ operational records** across **56 attributes** through cleaning, validation, and exploratory analysis.
- Built interactive **Power BI dashboards** that converted complex metrics into leadership-ready KPIs, enabling faster, data-driven decisions and eliminating manual reporting.

Technical Skills

Languages: Python, Java, C, C++, JavaScript, TypeScript, SQL

Web & Frontend: HTML, CSS, Bootstrap, React.js, Tailwind CSS

Data Science & Machine Learning: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Streamlit

Tools & Platforms: Power BI, MySQL, AWS, Docker, Git, MS Excel, Figma, Canva

Patents

Real Time Security Analysis for AI - Generated Code [Patent ID: 202641027876]

March 26

- An IDE-integrated platform that detects and fixes vulnerabilities in AI-generated code using static analysis and ML, with adaptive, context-aware remediation.

Extracurriculars & Achievements

Purchase Coordinator, Gravitas'25: Coordinated procurement & logistics for 150+ events at Gravitas'25.

Mozilla Firefox Club & IEEE-CS Chapter at VIT, Vellore: Core Member of the Design & Management domain.

Cognitive Exchange Advanced Debate Program: Secured 1st Place at the Final Competition.
